About Job Ready Sites

Being ready saves your company both time and money.

The Ohio Job Ready Sites Program, authorized by Ohio voters in 2005, was created to increase Ohio's inventory of available facility locations served by utility and transportation infrastructure. Sites improved under the program are developed and kept at-the-ready for future business prospects seeking locations for new or expanded operations in Ohio.

Wapakoneta was selected as one of Ohio's new Job Ready Sites in 2006. With more than 400 developed acres, the West Central Ohio Industrial Center at I-75 and US 33, will soon become one of Ohio's first certified manufacturing sites. We are ready to keep your new project on time and budget.
