

Tax Advantages

Reduce your operating costs with the lowest taxes in the Midwest.

Making a commitment to eliminate a burdensome tax system, Ohio in 2005 implemented full-scale, sweeping tax reform. Ohio's new business taxation model will mean a reduction in tax burden of up to 63% by 2010, the first year reform is fully implemented.

Ohio's new tax system means businesses can:

- Reduce operating costs - No tax on inventory or corporate income
- Enhance productivity - No tax on investments in machinery and equipment
- Attract talent - Shrink labor costs through a 21% reduction in personal income tax
- Enjoy a level playing field - All companies taxed the same low rate
- Boost return on investment - No tax on product sold to customers outside Ohio
- Reward entrepreneurship - First \$1 million in gross receipts are tax free

With these reforms, Ohio and communities like Wapakoneta will become even more competitive. Ohio's favorable business climate and high quality of living, combined with low business and personal costs, make us an increasingly viable location for business growth.

Ohio is one of the top five states ranked with the lowest effective tax rate on new investment

An Ernst & Young analysis of key manufacturing and service industries in these Midwestern states -- Illinois, Indiana, Michigan, Minnesota, and Wisconsin -- found that:

- Ohio's effective tax rate on new capital investment by manufacturing industries will be 40% lower than the five-state average.
- Ohio's effective tax rate on selected service industries will be 29% lower than the five-state average.
- For all industries studied, Ohio's effective state and local tax rate is 37% lower than the five-state average.

State Tax Rates

Ohio's tax on new investment is the lowest in the Midwest.

STATE TAXES

Corporate Income Tax - None
